PURE SCANDINAVIAN SOUND  
SINCE 1968

## PIONEERING A PURE SCANDINAVIAN SOUND SINCE 1968

Our story started in 1968 in Glyngøre, a tiny fishing village nestled on the north shore of Denmark. Jamo was founded by two brothers-in-law, Preben Jacobsen and Julius Mortensen. Preben was a talented craftsman with a passion for pure sound, blessed with excellent wood

working skills and a broad knowledge of acoustics. Julius was an experienced salesman from the fishing industry. The name was created using the first two letters of their surnames to form the company moniker: Jacobsen + Mortensen = JAMO.

## A NEW BEGINNING

Uniting the richness of the past with the audacity of the future, Jamo's vocation is to promote and perpetuate an exceptional heritage. With this new range, Jamo wants to satisfy a modern and demanding audience with exceptional audio solutions and a timeless Nordic design.

## A UNIQUE DESIGN HONOURING OUR SCANDINAVIAN ROOTS

Our design team has imagined a minimalist design for its new series. The organic shape of the cabinet houses acoustic innovations to deliver pure sound. The shape of the cabinet was inspired by Nordic nature. Its rounded corners resemble the pebbles of the Danish coast, smoothed by the ebb and flow of water. Thor's hammer shape on the woofers' paper cone is inspired by the axe used by the god Thor in Norse mythology. The matching fabric grilles bring softness and protection with shades of monochrome.

## 2 COLOR WAYS INSPIRED BY NORDIC NATURE

Our colours have been chosen from the chromatic palette of Scandinavian landscapes: the blue fjord is inspired by the Norwegian fjords and the grey from the clouds hanging over a Finnish forest. Jamo Studio 7 is for a pleasure of the ears and eyes.

GREY CLOUD

# STUDIO7 SERIES IN DEPTH

The acoustic centers of the drive units have been time-aligned by tilting the cabinet back and mounting it on a plinth that houses the speaker crossover. The result is a very coherent sound stage between the high, the medium and the bass frequencies.

Thick cabinet walls and bracing to ensure a low degree of "self-noise". This improves the audio reproduction of low-level detail and increases resolution when playing at any output level compared to competing products in their class.

Radius angles on the cabinet edge helps the energy dissipates more naturally, and avoid coloring the signal produced by the driver.

The crystal clear high frequencies are carried out by a all new 1 inch customized tweeter featuring a copper faraday ring which increases sensitivity and reduces non linear distortion. The tweeter and surround are made from fabric and exhibits excellent distortion characteristics and wide bandwidth, for a non fatiguing yet detailed sound.

The bass drivers with embossed paper cones incorporate aluminium shorting rings for very natural bass. The aluminium shorting ring lowers distortion for clean, dynamic bass and increases power handling. The embossed paper cone with 'Thor's Hammer' detailing increases the rigidity to improve the transient response for that snappy yet natural bass.

Scandinavian design, a perfect combination of simplicity and beauty

PURE SCANDINAVIAN SOUND  
SINCE 1968

## 7, THE MAGIC NUMBER ON THE STUDIO7 RANGE

7 Degree is the magic number on Jamo Studio 7 speakers. It provides a very distinctive look to the range and it improves the sound experience thanks to the angle created by the tilt (time alignment).

This series got its name from this 7° angle applied to the speakers.

Often recognized and appreciated for its symbolic richness, the number 7 is found in a large number of traditions, beliefs, legends and religions (*7 days of the week, 7 colors in a rainbow, the 7 Wonders of the World...*).

## EXTERNAL CROSSOVER PLINTH: FOR TRANQUILITY

By positioning the binding post on the back of the plinth, the microphonics are reduced, the inductors are kept away from harmful vibrations and cables are easy to connect.

## S7-27F FLOORSTANDING SPEAKERS

The largest floorstanding speakers in the Studio7 series, the S7-27F deliver outstanding audio performance in its signature aesthetic. Designed to fill larger rooms, these high-resolution speakers can equally be used at home in a system dedicated to either music or movies. The dual 6.69-inch (17 cm) woofers provide the mid-range and deep bass while the 1-inch (2.54 cm) tweeter delivers crystal clear highs. The crafted cabinet with its organic shape delivers a sound as pure as Scandinavian air.

## S7-25F FLOORSTANDING SPEAKERS

The Studio7 S7-25F are designed for those who look for a more compact floorstanding solution. This speaker incorporates two 5.5-inch (14 cm) woofers with a 'Thor's Hammer' embossed paper cone which deliver a punchy yet natural bass. High frequencies are handled by our 1-inch (2,54 cm) fabric dome tweeter which produce a smooth extended response with low levels of harmonic distortion even at high output levels. Combine this with an accurate and engaging midrange ensures that the S7-25F are a fabulous choice for both music and movies. The S7-25F floorstanding speakers are slim and compact enough to fit neatly into smaller rooms while delivering high levels of audio performance.

## S7-17B BOOKSHELF SPEAKER

The Studio7 S7-17B bookshelf speakers provide a superior sound in a small package and a great ease of placement. Thanks to its 1-inch (2,54 cm) tweeter and a large 6.69-inch woofer (17 cm), these bookshelf speakers deliver clear highs, detailed medium and natural bass. The S7-17B offer a wide sound stage so you can really enjoy your favorite content, be it music, movies or gaming. With these beautifully crafted speakers, you get the best package in terms of placement flexibility, occupied space and audio performance.

## S7-15B BOOKSHELF SPEAKER

The Studio7 S7-15B are very compact speakers designed for use in smaller rooms and still delivering incredible audio performance. Thanks to their small form factor, they can be installed on traditional speaker stands or cabinet as bookshelf speakers or wall mounted as surround speakers in a home theater system. (A separate dedicated wall mounting bracket system can be purchased separately). The S7-15B share the same 1-inch (2.54 cm) fabric dome tweeter and 5.5-inch woofer (14 cm) as the S7-25F which assures outstanding performance from low bass through to the extended high frequency. These compact speakers are equally at home with both movies and music.

## S7-25C CENTER CHANNEL

The center channel is the center piece of your home cinema system. The Studio7 S7-25C has been voiced to complement the floorstanding & bookshelf speakers of the Studio7 series. With a 1-inch (2,54 cm) tweeter and two 5.5-inch woofers (14 cm), the S7-25C center speaker is designed to be placed below your screen to deliver detailed, precise, clear voices and dialogues when you watch your favorite movies, shows, series or concerts.

## S7-43C CENTER CHANNEL

The Studio7 S7-43C also works with the floorstanding & bookshelf speakers of the Studio7 series. With a 1-inch (2,54 cm) tweeter and four 3.3-inch (8,4 cm) woofers, the S7-43C center channel is very slim to compliment today's flat-screen TVs with an unobtrusive footprint. Every care was taken to ensure the same performance is enjoyed bot on and off the listening axis. This center channel makes you catch every note and every nuance of the dialogue in your favorite movies, music, and games.

## JAMO HISTORY

**1968**

Jamo is founded  
by Preben Jacobsen  
& Julius Mortensen

**1978**

Over one million  
speakers rolled off  
the Glyngøre state  
of the art assembly line

**1992**

Jamo is the world's first  
loudspeaker manufacturer  
to receive ISO 9001 certification

**1994**

Jamo becomes the leading  
loudspeaker manufacturer  
in Europe and the first  
EMEA company to produce  
a THX certified speaker

**1997**

Jamo Concert receives  
the speaker of the year  
award in Europe

**2005**

Klipsch Group Inc.  
acquires Jamo as part  
of its global growth strategy

**2008**

Three brand's flagship floorstanding  
speaker, the Jamo R909 is named  
the best high-end speaker  
of the year in Europe

**2017**

The Studio 8 series range  
innovates with metal brackets  
located on the top of the cabinet.  
They serve as a connection point  
for the Dolby Amos S 8 1™ speaker

**2019**

Studio 8 S809 HCS speakers  
win the prestigious EISA  
"Best buy Home Theater  
Speaker System award"

**2022**

Rebirth of Jamo and launch  
of the Studio7 series
