

INSIDE THE TECH: HeadLamp Series

Our line of HeadLamps are not only designed for peak performance, the proprietary construction delivers the best fit of any headlamp on the market.

3D SLIMFIT CONSTRUCTION

By integrating our electronics into the fabric with a custom molded housing, we pack all your lighting into an ultra-thin facing that is designed to fit as seamlessly as a contact lens.

Our headlamps move with you as a single unit and you soon forget it's even there.

When you purchase a BioLite product, you support our work delivering renewable energy solutions to households living beyond the grid. This means cooking fires without smoke, solar panels that keep families charged, and lighting that extends the day when the sun goes down.

Thank you for helping us build a future where energy can be shared by all.
